15th Harghita Free Flight & 1st ROUESP Cup

World Cup F1ABCQ Events

Organizer: The ACS UNIREA Cristuru Secuiesc and the Romanian Modelling Federation are organizing an aeromodelling contest in the F1A, F1B, F1C, and F1Q categories for both seniors and juniors. Entry is open to anyone possessing a model compatible with FAI rules and a valid FAI license.

Awards: Prizes will be awarded to the top three competitors in every category. Junior competitors will also be ranked and awarded separately.

Contest Area: Salonta "BAIA VECHE", Romania (GPS: 46.838380, 21.580106). The flying field is located within a nature reserve. Participants are requested to respect the environment to ensure future access. Practice is permitted at the airfield in the days prior to the competition. However, vehicles are restricted to the road, and parking is only allowed alongside the road. During the competition, parking is mandatory in the designated area. Driving cars or motorbikes within the field is strictly prohibited. Models must be retrieved on foot or by bicycle. All garbage must be collected and removed by participants.

The organizers emphasize that the terrain, objects, buildings, plants, and animals at the site may pose certain risks. All participants are expected to act with due caution. By entering the contest, competitors acknowledge these conditions, and the organizers shall not be held responsible for any accidents.

FlyOff Regulations: During the FlyOff, FAI Sporting Code section "F1.2.8 - Evidence of flyoff times" will be strictly applied. An EDIC-approved altimeter is mandatory for flyoffs in F1A, F1B, F1C, and F1Q. The altimeter must be presented to the timekeeper before the flight to record the serial number and confirm that the memory is empty or that the device identifies the absolute time of the flight. After the flyoff, if five or fewer competitors achieve the maximum flight time, the top five must provide their altimeter traces for inspection. The contest director, in the presence of the jury, will examine the trace. If the launch, landing, and flight time are determined, that duration will be recorded. If the flight time cannot be determined from the trace, the score for that flight will be zero. Each competitor qualified for the FlyOff is required to provide a timekeeper.

Category F1Q - Deviation from Regulation 3.8.2: The motor run time is determined by a maximum energy amount. Motor runs exceeding 20 seconds are considered overruns. The energy budget for each model is 2 Joules per gram of the total weight. For energy calculations, any weight exceeding 550 grams is ignored.

Contest Director: István Kiss

Jury Members: To be announced prior to the contest

Entry Fee: Seniors: €50 / Juniors: €30

Applications: To be sent to cc.cristur@gmail.com or submitted via <https://model.wings.rs/competition.php> until June 17, 2026.

Protests: Must be submitted to the Jury within 15 minutes of the event in question, accompanied by a €50 deposit.

Contact Person: Tamara (Kiss) Biró

Accommodation: Information available for Salonta on www.booking.com

Program: Subject to change based on weather conditions
